

## fan Design

**fan** connects its STDIN to the STDINs of listed out-programs and STDOUTs from listed out-programs to STDINs of listed in-programs.

**fan** exits once all of its programs exit.

## Program

```
./fan [--out '<out>'...] [--in '<in>'...]
```

## Example

```
./fan --out 'echo a' --out 'echo b' --in 'cat' --in 'cat'
```

```
a
a
b
b
```
